

CBAM Valid

CBAM EXPORTER EVIDENCE DOSSIER

Prepared in accordance with Regulation (EU) 2023/956 & Implementing Regulation (EU) 2023/1773

PREPARED FOR INDEPENDENT ACCREDITED VERIFICATION

DOSSIER METADATA & SCOPE

Reference Code:	UNASSIGNED
Exporter Legal Name:	Global Steel Exporter Ltd
Declarant EORI Number:	GB123456789000
Target Facility Name:	Smelting Facility North
CN Classification Code:	72085120
Target Reporting Period:	2026 Q1
CBAM Product Sector:	STEEL

CONFIDENTIAL — FOR VERIFICATION PURPOSES ONLY

Dossier Status: DRAFT | Version: 1

Verification Seal: 2c1b2a5782ed6642cbf0e08ac8037c3a042abcf2b946c79c7c135ff43e6f3f78

REGULATORY CONTEXT & SCOPE

This evidence dossier acts as the central compliance summary document prepared in anticipation of independent accredited third-party verification under Article 8 of Regulation (EU) 2023/956. The data and activity metrics represented herein correspond to the production periods and operations of the declared installation. Under the CBAM framework, European customs declarants must verify the specific embedded direct and indirect emissions of imported goods using actual facility-level methodologies rather than country-level default factors starting from the end of the transitional period.

EXECUTIVE COMPLIANCE SUMMARY STATEMENT

The operator of Smelting Facility North hereby declares the operational metrics and emissions data compiled for the period of 2026 Q1. Authoritative calculations executed under the CBAM engine version 3.0.0 resolve specific direct emissions at 0.0000 tCO2e/t and specific indirect emissions at 0.0000 tCO2e/t. The aggregate embedded emissions total 0 tCO2e, resulting in a net CBAM certificate obligation of 0 certificates after eligible origin-pricing reductions.

' Verification Status: Ready for independent third-party accredited verification

2. Importer and Exporter Scope (Scope 1)

EXPORTER IDENTITY DETAILS

Exporter Legal Name: Global Steel Exporter Ltd

Production Country: N/A

Address Record: Provided in Evidence Register

IMPORTER IDENTITY DETAILS

Declarant EORI Number: GB123456789000

Importer Corporate Name: N/A

Importer Address: Provided in Registry SAD

GOODS CLASSIFICATION AND QUANTITY

Goods Tariff CN Code: 72085120

CBAM Production Sector: STEEL

Production Volume: 15000 Tonnes

Complex Goods Classification: Yes (Precursors Applicable)

SHIPMENT INTEGRITY STATS

Activity data ledgers contain direct linkages to physical shipment records and commercial invoices. The matching between factory batch dispatches and EU customs clearance records has been verified with 99.2% matching rate (n=150 shipments), ensuring 0 duplicates detected via UUID deduplication.

3. Installation Boundary and Technology (Scope 2)

PRODUCTION INSTALLATION METADATA

Facility Legal Name: Smelting Facility North

Geographical Location: Not Disclosed for Security

Operating Country: N/A

PRODUCTION ROUTE AND TECHNOLOGY

Production Route Applied: N/A

Regulatory Sector Class: STEEL

Benchmark Target Level: Annex VIII Benchmark Target

SYSTEM BOUNDARY REGISTRATION

Active: Coke Oven + Blast Furnace + Basic Oxygen Furnace (BF-BOF)

PRECURSOR MATERIALS SCOPE

Precursors Subject to CBAM: Yes — Precursor Ledger Active

Precursor Evidence Coverage: 100% Verified Actual Data

4. Embedded Emissions Inventory

Emission Scope / Activity Metric	Metric Value	Unit	Data Source
Direct Emissions (Facility)	N/A	tCO2e	Primary Meter
Direct Emissions (Precursors)	N/A	tCO2e	Primary Ledger
Total Direct Emissions	0	tCO2e	Reconciled
Electricity Consumed	12000	MWh	Utility Invs
Grid Emission Factor	0.45	tCO2/MWh	National Grid
Indirect Emissions (Electricity/Facility)	N/A	tCO2e	Calculated
Indirect Emissions (Precursors)	N/A	tCO2e	Calculated
Total Indirect Emissions	0	tCO2e	Reconciled
Total Embedded Emissions	0	tCO2e	Reconciled
Specific Direct Emissions (Per unit)	0.0000	tCO2e/t	Calculated
Specific Indirect Emissions (Per unit)	0.0000	tCO2e/t	Calculated
Total Specific Embedded Emissions	N/A	tCO2e/t	Reconciled

PRECURSOR MATERIALS INVENTORY

No precursor materials are registered or applicable for this CN sector (Simple Good).

EMISSIONS RECONCILIATION SUMMARY

The total embedded emissions for the reporting period resolve to 0 tonnes of CO2 equivalent. This calculation accounts for direct combustion streams, process inputs, and indirect grid factors. All calculation variables reconcile to installation-level totals without double-counting.

5. Carbon Price Paid and Financial Exposure

NET LIABILITY DETERMINATION	
Gross Certificates Required (1:1):	0 certificates
Benchmark Phase-In adjustment:	100% of liability applies (factor = 1.00)
Carbon Price Paid Deduction:	0 certificates
Net CBAM Certificates Due:	0 certificates

CERTIFICATE PRICING ANALYSIS	
Weekly ETS Average Resolved:	75.36 EUR/certificate
Pricing Dataset Version:	EU_CBAM_PRICE_2026_Q1
Estimated Financial Obligation:	0 EUR

ESTIMATED FINANCIAL OBLIGATION:	
0 EUR	Advisory — based on current EU ETS certificate averages. Final obligation determined by Registry.

CARBON PRICE PAID IN COUNTRY OF ORIGIN
No carbon price records are registered for this case. Exporter is not claiming origin pricing reductions.

6. Methodology Decision Log and Quality Control

METHODOLOGY DECISIONS REGISTRATION

1. System Boundary Scope

Selected Method: Installation-level continuous monitoring (Active: N/A) | Basis: Annex II boundary rules, Article 4 (2)

2. Direct Emission Method

Selected Method: Source stream analysis / fuel factor calculation | Basis: Article 4 implementing acts

3. Electricity Factor Source

Selected Method: National Grid Average mix factor | Basis: Annex III Section B.4.3

4. Fuel Source Stream Classification

Selected Method: Category A (Pure Coke/Coal) | Basis: Commission Regulation (EU) 2020/2085

5. Measurement Uncertainty Budget

Selected Method: Uncertainty < 1.5% (ISO GUM compliant) | Basis: EN ISO 5167 standard

6. Missing Data Protocol (Article 16)

Selected Method: Historic extrapolation rules | Basis: Implementing Regulation Article 16

7. Data Quality Rating (Tier Level)

Selected Method: Tier 3 (Highest direct measurement) | Basis: Annex III Data Tiers Reference

QUALITY CONTROL & DATA GAP SUMMARY

VERIFICATION READINESS GATES: PASSED

No critical data gaps, unapproved evidence records, or methodology deviations were detected. The completeness score is 94.5%, which is above the 85% threshold defined under Article 12(1)(a) registry criteria.

VERIFICATION READINESS CHECKLIST

- ☒ Manufacturer Identity Proven

☒ CN Code Classification Aligned

☒ Energy Activity Records Uploaded

☒ Precursor Emission Evidences Seal
- ☒ System Boundaries Explicitly Mapped

☒ Methodology Log Declarations Complete

☐ Carbon price deductions receipt check

☒ Completeness Score > 85% (Registry Criterion)

7. Mathematical Audit Trace

This section provides the deterministic trace of all mathematical operations performed by the calculation engine.

8. Cryptographic Package Manifest and Sign-off

FUTURE ROADMAP: DIGITAL SEAL AND PAdES INTEGRATION

Note for next release phase: This dossier is prepared with structural JSON/XML hashes. Future updates will support direct cryptographic sealing of the PDF document conforming to the PAdES (PDF Advanced Electronic Signatures) standard, enabling fully automated, cloud-signed verification certificates.
