This operator-prepared package supports preparation for independent CBAM review. It is not an independent verification opinion, a reasonable-assurance conclusion, a customs decision, an EU approval, a CBAM Registry submission, or a guarantee of acceptance.

This pack represents the operator's internal automated readiness work. Independent accredited verifier review status remains NOT REVIEWED. ACCREDITED VERIFICATION OPINION is required for customs submission.

Executive Board & Scoring Matrix

The following summary table outlines the key metrics and decisions for senior executive/CFO review before independent verifier handover.

Readiness Score						
33.33/100	1	17	19	16	0	DO_NOT_SUBMIT

Gaps, incomplete assessment coverage, or blockers detected. Remediation is required before accredited verifier engagement.

Assessed coverage: 100% of weighted dimensions. Passed within assessed: 33.33%.

6. Readiness Score and Hard Gates

The diagnostic score is the absolute sum of weighted dimension scores out of 100. NOT_ASSESSED dimensions contribute zero and prevent OPERATOR_PREPARATION_COMPLETE. Hard blockers override the score and force NOT_READY.

Governance, Audit Trails & Manifest Sign-Off

The operator-supplied activity data and monitoring instruments are evaluated against definitive-period embedded-emissions methodology under Commission Implementing Regulation (EU) 2025/2547 of 10 December 2025 laying down rules for the application of Regulation (EU) 2023/956 as regards the methods for the calculation of emissions embedded in goods (CELEX 32025R2547). No data gaps were auto-filled using unverified figures.

Topic			
Precursor Scope	No qualifying precursor line is declared for the fixture goods and controlled route.	The controlled bill of materials and production route contain no separate precursor goods requiring an additional precursor line in this fixture.	Accepted
Goods Emissions Allocation	Allocate installation emissions using documented product mass shares of 0.6 and 0.4.	The two goods are produced in the same controlled period and the reconciled product ledger provides complete mass shares summing to one.	Accepted
