

# Production Process Map

Controlled flow from source data to verifier review

Package A1111 | Release 5

AUTOMATED PREPARATION CHECKS  
PASSED

CONFIDENTIAL - VERIFIER PREPARATION WORKSPACE

## DOCUMENT BOUNDARY

This package supports preparation for independent verification. It is not a verification opinion, accreditation decision, customs decision, CBAM Registry submission or acceptance guarantee.

| Control field |                                                                      |                 |                          |
|---------------|----------------------------------------------------------------------|-----------------|--------------------------|
| Case ID       | case_verifier_grade_fixture                                          | Generated       | 2027-01-15T12:00:00.000Z |
| Ruleset       | 3.0.0                                                                | Source registry | CBAM-EU-2026.07.16       |
| Root hash     | 600d43216707914bbfce0cd2b334660981025fb03e<br>e5b8782ace064333795951 | Verifier status | NOT_REVIEWED             |

## End-to-end process

| Stage |                                                                              |                                            |
|-------|------------------------------------------------------------------------------|--------------------------------------------|
| 1     | Identify installation, operator, CN-coded goods and reporting period         | CASE and GOODS registers                   |
| 2     | Define production processes, source streams, boundaries and functional units | Monitoring Plan and System Boundary        |
| 3     | Capture direct, electricity and precursor data with approved evidence        | INPUTS, PRECURSORS and EVIDENCE            |
| 4     | Apply unit conversions, allocation and embedded-emissions formulae           | CALCULATION_TRACE and root hash            |
| 5     | Run evidence, methodology, reconciliation and integrity controls             | QUALITY_CONTROLS and MONITORING_PLAN       |
| 6     | Apply per-good 5% materiality reference for verifier planning                | GOODS materiality columns                  |
| 7     | Freeze, hash, sign and commit immutable package                              | Manifest, KMS signature and package hash   |
| 8     | Independent accredited verifier performs review and records opinion          | VERIFIER_SIGN_OFF — initially NOT_REVIEWED |

## Production-route context

Iron and Steel: Coke oven, sinter or pellet preparation, blast furnace, basic oxygen furnace, direct reduction, electric arc furnace, casting and finishing processes within the installation boundary.
