PRECURSOR_SCOPE	No qualifying precursor line is declared for the fixture goods and controlled route.	The controlled bill of materials and production route contain no separate precursor goods requiring an additional precursor line in this fixture.	ACCEPTED
GOODS_EMISSIONS_ALLOCATION	Allocate installation emissions using documented product mass shares of 0.6 and 0.4.	The two goods are produced in the same controlled period and the reconciled product ledger provides complete mass shares summing to one.	ACCEPTED

23. Findings Register
No open findings or non-conformities are detected.

24. Corrective Action Plan
All corrective actions are closed or not required.
