

CBAM EXPORTER EVIDENCE DOSSIER

Prepared in accordance with Regulation (EU) 2023/956 & Implementing Regulation (EU) 2023/1773

PREPARED FOR INDEPENDENT ACCREDITED VERIFICATION

DOSSIER METADATA & SCOPE

Reference Code:	CBAM-C-C45F6542
Exporter Legal Name:	Global Steel Exporter Ltd
Declarant EORI Number:	IE123456789123
Target Facility Name:	Smelting Facility North
CN Classification Code:	72085120
Target Reporting Period:	2026 Q1
CBAM Product Sector:	IRON_AND_STEEL
Generated on (UTC):	Fri, 17 Jul 2026 21:35:49 GMT

CONFIDENTIAL — FOR VERIFICATION PURPOSES ONLY

Dossier Status: SEALED | Version: 1

Verification Seal: 23bb1f45bfdba7b0ab947cca2efc8bcc6e34fd964a734819c7c192a7e89e1e50

DOSSIER SECTION INDEX

1. Executive Summary and Table of Contents	Page 2
2. Importer and Exporter Scope (Scope 1)	Page 3
3. Installation Boundary and Technology (Scope 2)	Page 4
4. Embedded Emissions Inventory	Page 5
5. Carbon Price Paid and Financial Exposure	Page 6
6. Methodology Decision Log and Quality Control	Page 7
7. Mathematical Audit Trace	Page 8
8. Cryptographic Package Manifest and Sign-off	Page 11

REGULATORY CONTEXT & SCOPE

This evidence dossier acts as the central compliance summary document prepared in anticipation of independent accredited third-party verification under Article 8 of Regulation (EU) 2023/956. The data and activity metrics represented herein correspond to the production periods and operations of the declared installation. Under the CBAM framework, European customs declarants must verify the specific embedded direct and indirect emissions of imported goods using actual facility-level methodologies rather than country-level default factors starting from the end of the transitional period.

EXECUTIVE SUMMARY — READY FOR ACCREDITED AUDIT

Total Embedded Emissions: 34700 tCO₂e
Specific Direct Emissions: 1.9300 tCO₂e/t
Specific Indirect Emissions: 0.3833 tCO₂e/t
Total Specific Embedded Emissions: 2.3133 tCO₂e/t
Net CBAM Certificates Due: 34691.79 certificates
Estimated Financial Exposure: 2619230.15 EUR

EXPORTER IDENTITY DETAILS

Exporter Legal Name: Global Steel Exporter Ltd

Production Country: TR

Address Record: Provided in Evidence Register

IMPORTER IDENTITY DETAILS

Declarant EORI Number: IE123456789123

Importer Corporate Name: CBAMImporter Ireland Ltd

Importer Address: Provided in Registry SAD

GOODS CLASSIFICATION AND QUANTITY

Goods Tariff CN Code: 72085120

CBAM Production Sector: IRON_AND_STEEL

Production Volume: 15000 Tonnes

Complex Goods Classification: Yes (Precursors Applicable)

SHIPMENT INTEGRITY STATS

Activity data ledgers contain direct linkages to physical shipment records and commercial invoices. The matching between factory batch dispatches and EU customs clearance records has been verified with 99.2% matching rate (n=150 shipments), ensuring 0 duplicates detected via UUID deduplication.

PRODUCTION INSTALLATION METADATA

Facility Legal Name:	Smelting Facility North
Geographical Location:	Not Disclosed for Security
Operating Country:	TR

PRODUCTION ROUTE AND TECHNOLOGY

Production Route Applied:	Blast Furnace Route (BF-BOF)
Regulatory Sector Class:	IRON_AND_STEEL
Benchmark Target Level:	Annex VIII Benchmark Target

SYSTEM BOUNDARY REGISTRATION

Active: Coke Oven + Blast Furnace + Basic Oxygen Furnace (BF-BOF)

PRECURSOR MATERIALS SCOPE

Precursors Subject to CBAM:	Yes — Precursor Ledger Active
Precursor Evidence Coverage:	100% Verified Actual Data

EMBEDDED EMISSIONS INVENTORY

Emission Scope / Activity	Metric Value	Unit	Data Source
Direct Emissions (Facility)	27750	tCO2e	Primary Meter
Direct Emissions (Precursors)	1200	tCO2e	Primary Ledger
Total Direct Emissions	28950	tCO2e	Reconciled
Electricity Consumed	12000	MWh	Utility Invs
Grid Emission Factor	0.4500	tCO2/MWh	National Grid
Indirect Emissions (Electricity)	5400	tCO2e	Calculated
Indirect Emissions (Precursors)	350	tCO2e	Calculated
Total Indirect Emissions	5750	tCO2e	Reconciled
Total Embedded Emissions	34700	tCO2e	Reconciled
Specific Direct Emissions	1.9300	tCO2e/t	Calculated
Specific Indirect Emissions	0.3833	tCO2e/t	Calculated
Total Specific Embedded	2.3133	tCO2e/t	Reconciled

PREMIUM PRECURSOR DETAILED INVENTORY

Precursor: Pig Iron precursor | Quantity: 12000 t | Direct: 1200 tCO2e | Indirect: 350 tCO2e

EMISSIONS RECONCILIATION SUMMARY

The total embedded emissions for the reporting period resolve to 34700 tonnes of CO2 equivalent. This calculation accounts for direct combustion streams, process inputs, and indirect grid factors. All calculation variables reconcile to installation-level totals without double-counting.

NET LIABILITY DETERMINATION

Gross Certificates Required (1:1):	34700 certificates
Benchmark Phase-In adjustment:	100% of liability applies
Carbon Price Paid Deduction:	8.21 certificates
Net CBAM Certificates Due:	34691.79 certificates

CERTIFICATE PRICING ANALYSIS

Weekly ETS Average Resolved:	75.50 EUR/certificate
Pricing Dataset Version:	EU_CBAM_PRICE_2026_Q1
Estimated Financial Obligation:	2619230.15 EUR

ESTIMATED FINANCIAL OBLIGATION: 2619230.15 EUR

CARBON PRICE PAID IN COUNTRY OF ORIGIN

Amount Paid in Origin:	21700.00 TRY
Legislation Reference:	TR Carbon Tax Law 44
Certificate Reduction Equivalent:	8.21 certificates
	(= 620.00 EUR converted from 21700.00 TRY / 75.50 EUR/certificate)
Deduction Justification:	Documented proof of payment attached

METHODOLOGY DECISIONS REGISTRATION

1. System Boundary Scope

Selected Method: Coke Oven + Blast Furnace + Basic Oxygen Furnace (BF-BOF) | Basis: Annex II boundary rules, Article 4 (2)

2. Direct Emission Method

Selected Method: Source stream analysis / fuel factor calculation | Basis: Article 4 implementing acts

3. Electricity Factor Source

Selected Method: National Grid Average mix factor | Basis: Annex III Section B.4.3

4. Fuel Source Stream Classification

Selected Method: Category A (Pure Coke/Coal) | Basis: Commission Regulation (EU) 2020/2085

5. Measurement Uncertainty Budget

Selected Method: Uncertainty < 1.5% (ISO GUM compliant) | Basis: EN ISO 5167 standard

6. Missing Data Protocol (Article 16)

Selected Method: Historic extrapolation rules | Basis: Implementing Regulation Article 16

7. Data Quality Rating (Tier Level)

Selected Method: Tier 3 (Highest direct measurement) | Basis: Annex III Data Tiers Reference

QUALITY CONTROL & DATA GAP SUMMARY

VERIFICATION READINESS GATES: PASSED

No critical data gaps... completeness score is 94.5%, which is above the 85% threshold.

VERIFICATION READINESS CHECKLIST

- Manufacturer Identity Proven
- CN Code Classification Aligned
- Energy Activity Records Uploaded
- Precursor Emission Evidences Seal
- System Boundaries Explicitly Mapped
- Methodology Log Declarations Complete
- Carbon price deductions receipt check
- Completeness Score > 85%

MATHEMATICAL AUDIT TRACE

This section provides the deterministic trace of all mathematical operations performed by the calculation engine.
