21. Data Quality, Uncertainty, and Missing Data

The operator-supplied activity data and monitoring instruments are evaluated against standard EU ETS / CBAM uncertainty tiers (Implementing Regulation (EU) 2023/1776 Annex III). No data gaps were auto-filled using unverified figures.

Declared Data Stream			
Direct Emissions	Documented direct measurement and reconciled production ledger	Verified monitoring package, controlled record V1	COMPLIANT
Electricity Consumed	Documented direct measurement and reconciled production ledger	Verified monitoring package, controlled record V1	COMPLIANT
Grid Emission Factor	Documented direct measurement and reconciled production ledger	Verified monitoring package, controlled record V1	COMPLIANT

22. Methodology Decision Register

Topic			
Precursor Scope	No qualifying precursor line is declared for the fixture goods and controlled route.	The controlled bill of materials and production route contain no separate precursor goods requiring an additional precursor line in this fixture.	Accepted
Goods Emissions Allocation	Allocate installation emissions using documented product mass shares of 0.6 and 0.4.	The two goods are produced in the same controlled period and the reconciled product ledger provides complete mass shares summing to one.	Accepted

23. Findings Register

No open findings or non-conformities are detected.

24. Corrective Action Plan

All corrective actions are closed or not required.
