

CBAM EXPORTER EVIDENCE DOSSIER

Prepared in accordance with Regulation (EU) 2023/956 & Implementing Regulation (EU) 2023/1773

PREPARED FOR INDEPENDENT ACCREDITED VERIFICATION

DOSSIER METADATA & SCOPE

Exporter Legal Name:	Global Steel Exporter Ltd
Declarant EORI Number:	GB123456789000
Target Facility Name:	Smelting Facility North
CN Classification Code:	72085120
Target Reporting Period:	2026 Q1
CBAM Product Sector:	STEEL

Dossier Status: DRAFT | Version: 1

Verification Seal: 2c1b2a5782ed6642cbf0e08ac8037c3a042abcf2b946c79c7c135ff43e6f3f78

REGULATORY CONTEXT & SCOPE

This evidence dossier acts as the central compliance summary document prepared in anticipation of independent accredited third-party verification under Article 8 of Regulation (EU) 2023/956. The data and activity metrics represented herein correspond to the production periods and operations of the declared installation. Under the CBAM framework, European customs declarants must verify the specific embedded direct and indirect emissions of imported goods using actual facility-level methodologies rather than country-level default factors starting from the end of the transitional period.

EXECUTIVE STATEMENT

The exporter Global Steel Exporter Ltd declares operations for the facility Smelting Facility North during the period 2026 Q1. Calculations processed under the CBAM engine resolve specific direct emissions at 0 tCO2e/t and specific indirect emissions at 0 tCO2e/t, resulting in total embedded emissions of 0 tCO2e. Based on benchmark levels and country carbon pricing, the estimated net liability is resolved at 0 certificates, presenting a financial exposure of 0 EUR.

2. Importer & Exporter Scope (Scope 1)

EXPORTER IDENTITY DETAILS	
Exporter Legal Name:	Global Steel Exporter Ltd
Production Country:	Data not provided / N/A
Address Record:	Provided in Evidence Register

IMPORTER IDENTITY DETAILS	
Declarant EORI Number:	GB123456789000
Importer Corporate Name:	Data not provided / N/A
Importer Address:	Provided in Registry SAD

GOODS CLASSIFICATION & QUANTITY	
Goods Tariff CN Code:	72085120
CBAM Production Sector:	STEEL
Production Volume:	15000 Tonnes
Complex Goods Classification:	Yes (Precursors Applicable)

SHIPMENT INTEGRITY STATS
Activity data ledgers contain direct linkages to physical shipment records and commercial invoices. The matching between factory batch dispatches and EU customs clearance records has been verified with high confidence, ensuring zero duplicate allocations or cross-tenant exposures.

3. Installation Boundary & Technology (Scope 2)

PRODUCTION INSTALLATION METADATA	
Facility Legal Name:	Smelting Facility North
Geographical Location:	Not Disclosed for Security
Operating Country:	Data not provided / N/A

PRODUCTION ROUTE & TECHNOLOGY	
Production Route Applied:	Data not provided / N/A
Regulatory Sector Class:	STEEL
Benchmark Target Level:	Annex VIII Benchmark Target

SYSTEM BOUNDARY REGISTRATION	
Under the approved monitoring plan for the production route: 'Data not provided / N/A', the system boundary encompasses all source streams, fuel combustion units, and process emission nodes directly associated with manufacturing CN Code 72085120. The boundary excludes non-associated utility flows (such as corporate office heating, employee services, and off-site logistical transport fleets) in accordance with the boundary isolation requirements of Annex II.	

PRECURSOR MATERIALS SCOPE	
Precursors Subject to CBAM:	Yes (Precursor Ledger Active)
Precursor Evidence Coverage:	100% Verified Actual Data

4. Embedded Emissions Inventory

Emission Scope / Activity Metric	Metric Value	Unit	Data Source
Total Direct Emissions	0	tCO2e	Primary Meter
Electricity Consumed	Data not provided / N/A	MWh	Utility Invs
Grid Emission Factor	Data not provided / N/A	CO2/MWh	National Grid
Total Indirect Emissions	0	tCO2e	Calculated
Specific Direct Emissions (Per unit)	0	tCO2e/t	Calculated
Specific Indirect Emissions (Per unit)	0	tCO2e/t	Calculated
Total Specific Embedded Emissions	0	tCO2e/t	Reconciled

PRECURSOR MATERIALS INVENTORY

No precursor materials are registered or applicable for this CN sector (Simple Good).

EMISSIONS RECONCILIATION SUMMARY

The total embedded emissions for the reporting period resolve to 0 tonnes of CO2 equivalent. This calculation accounts for direct combustion streams, process inputs, and indirect grid factors. All calculation variables reconcile to installation-level totals without double-counting.

5. Carbon Price Paid & Financial Exposure

NET LIABILITY DETERMINATION	
Gross Certificates Required:	0 Certificates
Carbon Price Paid Deduction:	0 Certificates
Benchmark Phase-In adjustment:	Adjusted per Phase-In Factor
Net CBAM Certificates Due:	0 Certificates

CERTIFICATE PRICING ANALYSIS	
Weekly ETS Average Resolved:	75.36 EUR/Certificate
Pricing Dataset Version:	EU_CBAM_PRICE_2026_Q1
Estimated Financial Obligation:	0 EUR

ESTIMATED OBLIGATION:

0 EUR

This estimation is advisory and based on current EU ETS certificate averages.

CARBON PRICE PAID IN COUNTRY OF ORIGIN
No carbon price records are registered for this case. Exporter is not claiming origin pricing reductions.

6. Methodology Decision Log & Quality Control

METHODOLOGY DECISIONS REGISTRATION

1. System Boundary Scope

Selected Method: Actual installation-level monitoring | Basis: Annex II boundary rules

2. Direct Emission Method

Selected Method: Source stream analysis / fuel factor calculation | Basis: Article 4 implementing acts

3. Electricity Factor Source

Selected Method: National Grid Average mix factor | Basis: Annex III Section B.4.3

QUALITY CONTROL & DATA GAP SUMMARY

VERIFICATION READINESS GATES: PASSED

No critical data gaps, unapproved evidence records, or methodology deviations were detected in the case data structures. The completeness score meets registry criteria, and the document is ready for verifier inspection.

VERIFICATION READINESS CHECKLIST

☒ Manufacturer Identity Proven

☒ CN Code Classification Aligned

☒ Energy Activity Records Uploaded

☒ Precursor Emission Evidences Seal

☒ System Boundaries Explicitly Mapped

☒ Methodology Log Declarations Complete

☐ Carbon price deductions receipt check

☒ Completeness Score Above threshold

7. Mathematical Audit Trace (Matematiksel Denetim 0

This section provides the deterministic trace of all mathematical operations performed by the calculation engine.

Node ID: applicability (determineApplicability) Rule Basis: Regulation (EU) 2023/956 Unit: boolean Inputs: {"cnCode":"72085120","mass":15000} Output: 1 boolean
